

# Photojournalism Pinterest Board

Using your school email address, create a Pinterest account. You will be looking for different photography techniques and assignments. You will also be looking for different ways to learn the same thing. If you have issues, please use a gmail account.

Using Pinterest, you are responsible for creating the following boards:

Photos I Love

Photography Basics

Improving Photography

Action Photography

Lighting

Photoshop Editing

You will find at least 5 quality pins for each board before next class. Please be prepared to share them with the class. Additionally, you will have to tell us how to find you so the class can follow your board. Please remember this board should only have appropriate items. We will be adding to these boards through out the school year.
